English: Active Learners Confidence Enquire

This half term we begin with narrative poetry and the story of young Albert and a cheeky lion. This links nicely to our local heritage and the history of holidays on the Fylde coast. We will then be moving on to report writing, charting the history of the railway station in Preston. We will be finishing our school year by exploring famous Prestonians and finally writing our own autobiographies, reflecting on our lives so far.

Pride

Enquire

Maths: Confidence, Bold, Active Learners

This half term we will be continuing to build on our knowledge of measures, applying this to perimeter, area and volume. We will then be exploring 3D shape and measuring angles. Using our knowledge of missing numbers, we will move on to explore algebra, learning key vocabulary of formulae and expression. Finally, we will finish the year with a review of calculation, making sure we are tip top ready for September.

History and Geography: Heritage Thirst for Knowledge

History: The development of Preston as a town with a focus on the history of the railways. We will then explore how the development of rail travel changed life in our town and throughout the country.

Geography: Rail travel through Preston station to Blackpool was key to the holidays of many people in the late 1800s. We will be investigating the geography of both towns and changes in land use over time.

High School Transition

DT and Art: Active Learners Enrichment

DT: Blackpool is famous for its fairground rides, as is Preston every Whitsuntide. Using cams, pulleys and levers, we will create our own fairground favourites.

Art: How have artists portrayed the seaside? We will focus on the skills of texture and perspective. Lowry will be a focused artist.

Science: Active Learners Partnerships Knowledge

Last half term saw us work with different series circuits and learn all about their matching symbol in a circuit diagram. This half term we will continue to progress, solving problems with circuits, identifying if a circuit is workable and moving on to exploring alternatives to cells. We will use our circuit skills and the Crumble to power motors on sensors linked to our fairground rides.

P.E: Active learners Partnerships Confidence

Cricket - Active Learners Basketball - Partnerships

IT: Meaningful progression of skills

Exploring the Crumble further with buzzers and motors linked to fairground rides. Responsible internet use with summer holidays in mind.
