

Father God,

Thank you for the world that you created. We are so grateful for our friends, our families and our teachers who make our lives full every day.

Thank you for our pets, the games we have and the things that keep us from getting bored.

Be with the farmers at harvest and let them know how grateful we are for the food we have to eat.

We pray for peace in the wars around the world. Be with the people and give them courage and perseverance. We also pray for the future of our planet. Help us to not take for granted the world that you have created.

Help us to remember to thank you in the good times and come to you with worries in the bad.

In Jesus name we pray,
